(54) VENTILATING ROOF STRUCTURE AND
VENTILATING TILE BATTENS

COPYRIGHT: (C)2000,JPO

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a ventilating roof structure excellent in ventilation efficiency and work efficiency of an attic space of a building at a low cost and ventilating tile battens used therefor.

SOLUTION: The ventilating roof structure and ventilating tile battens 1 are so constituted that a long and parallel ventilation hole 12 is formed in a roof boarding 11 on a roof along a ridge 10, tile battens 1 form a plurality of venting holes 6 on the longitudinal side of long sideways tile battens, a venting space 8 is so formed in the lower surface along the longitudinal direction that it is connected to the venting holes 6, the venting space 8 of the ventilating tile battens 1 are connected to the ventilation hole 12 of the roof boarding 11 to fix the ventilating tile battens 1 on the roof boarding 11 and that hot air of an attic space is exhausted to the outside from the venting holes 6 through the ventilation hole 12 and venting space 8.
